4. Enter the following:
   - Security: **WPA & WPA2 Enterprise**
   - Authentication: **Protected EAP (PEAP)**
   - CA Certificate: Check "**No CA certificate is required**"
   - PEAP Version: **Automatic**
   - Inner Authentication: **MSCHAPv2**
   - Username: **(username)**
   - Password: **(Password)**

5. Click **Apply** to connect.

Forgetting a Wireless Network

Sometimes during wireless usage, your computer or device may have trouble using or reconnecting to a saved wireless connection such as WIFI@OU. You may wish to remove the network, and then re-add it.

ANDROID:

1. From the home screen, choose **Settings**.

2. In the settings menu, choose **Wi-Fi**.

3. Locate the network in question and tap or press and hold it.

4. Choose **Forget**.

5. If you wish to re-add the network, return to the list of available networks and select to connect to the network in question.

MAC OS (APPLE LAPTOP):

1. Click the **Wi-Fi symbol** at the top of your screen, and select **Open Network Preferences**.

2. In the lower-right corner, choose **Advanced**.

3. Under Preferred Networks select the network you wish your computer to forget.

4. Click the minus **(-)** button to forget.

5. Click **OK**.

6. If you wish to re-add the network, return to the list of available networks and select to connect to the network in question.

MAC iOS (APPLE PHONE OR IPAD):

1. From the home screen, choose **Settings**.

2. In the settings menu, choose **Wi-Fi**.

3. Locate the network you wish for your device to forget and click the **blue icon** next to the name.

4. If the option to forget the network is available, tap **Forget this Network**. If you do not see the option to forget the network:

5. From the home screen, choose **Settings**.

6. In the settings menu, choose **General**.

7. Locate **Profiles** and tap on it.

8. Select the profile for the network.

9. Tap on **Delete Profile**.

10. If you wish to re-add the network, return to the list of available networks and select to connect to the network in question.

WINDOWS 10:

1. Click the **network icon** on the lower right corner of your screen.

2. Choose **Network & Internet settings**.

3. Click on **Wi-Fi** in the left menu.

4. Under Manage known networks, select the network in question.

5. Then click the **Forget** button.

6. If you wish to re-add the network, return to the list of available networks and select to connect to the network in question.

WINDOWS PHONE:

1. From the home screen menu, choose **Settings**.

2. In the setting menu, choose **Network & wireless**.

3. Select **Wi-Fi**.

4. Select **Manage known networks**.

5. Select the network in question, then click the **Forget** button.

6. If you wish to re-add the network, return to the list of available networks and select to connect to the network in question
